

Cameroonian Crystallographic Association : Activities and Projects

By

**Patrice KENFACK TSOBNANG,
University of Yaounde I, Cameroon**

Cameroon

Activities

Organization of crystallographic courses every two years, with participation of some recognized crystallographers

**Intense crystallographic course in Dschang, 2012
(40 participants)**

Training Workshop in 2013 (55 participants)

Activities

Build and strengthen relationship between Cameroonian universities, and between these universities and others around the world.

Goal

Find research stays for PhD-students and teachers working around crystallography

- Cameroonian cooperation with the country of the the host laboratories (**France, China, Germany, Others countries, etc.**)
- Programs like **TWAS, intra ACP-academic mobility,**
- **Host laboratories**

Funding

Activities

Promotion of crystallography in secondary schools

Scientific Club, secondary school

- Movies around crystallography
- Coloring some pictures via symmetry
- Crystal growth competition
- Etc.

Projects

- ❑ **Continue the training of young crystallographers**
- ❑ **Make a framework between Cameroonian universities and industries (mining and material industries).**

Projects

- ❑ **Contribute to install equipments in Cameroon (diffractometers, spectrophotometers)**

- ❑ **Strengthening our relationships with other associations around the world**

**THANK YOU FOR YOUR
KIND ATTENTION**
